Subject: Microsoft Settlement

This is a terrible miscarriage of justice. Microsoft should not be held to this ridicule. They are the creature of this soft ware and should be governed by the consumers and not by the government. Microsoft and their operating system are vary big and yes their is a reason for that. It s because they made a produce that was needed. They were is the right place at the right time and created a demand for their produce because people wanted it and it was a good product. Now that they are successful they are being penalized for it. Of course others are going to complain about it that s because others are trying to get a piece of the action and get it any way they can. The actions brought against Microsoft is also an action against the free enterprise of the United States of America.
